Discussion:

1. On agenda no. 1 proceeding of previous meeting was read before all members. It was reviewed that construction part is very slow regarding boundary all and main gate. Financial constraint and problem of the contractor was the hurdle. While construction of cycle stand required less capital and time but construction of boundary wall was full of problems. It requires huge amount. Still it was decided to construct it from side of the college with a gate. Otherwise iron-ware fencing might be solution.

2. On agenda no. 2, analysis of S.S.R. preparation, it was found that about 50% of work was complete and it was on process. Chairperson and coordinator encouraged all and they sought maximum co operation from all staffs of the college for completion of S.S.R.
